<b>Reading- 15</b>			
<p><b>6. Read the following passage and answer the questions.</b></p> <p>On August 6, 1945, the first atomic bomb was dropped on Hiroshima, in Japan. It produced an explosion equal to 20,000 tons of T.N.T. (until then the most powerful explosive that the world had known). It killed about 200,000 people. If this bomb had not been used then, the world would not have realized _____ to _____ the _____ full _____ its destructive power. Since then, a hydrogen bomb has been perfected by certain world powers. It is believed that this terrible bomb, if it is exploded, will release energy equal to 100 megatons, that is to say one hundred million tons of T.N.T. The Hiroshima bomb killed 200,000 people. That is a terrible number _____ of _____ deaths; _____ but _____ if a single hydrogen bomb is used in warfare, it will kill about a thousand million people. If five such bombs are dropped on the five inhabited continents, the entire population of the world, which is estimated at about three thousand million people, will be destroyed. This is the reason why the great mass of the people in the world do not want another war. If there were another war, and if hydrogen bombs were to be used in it, the whole world would be destroyed.</p>
